Fax: +49 (0) 25 75/9 38 48 24
E-Mail: input@hgh-card.de

DentaFlossCard 10ten

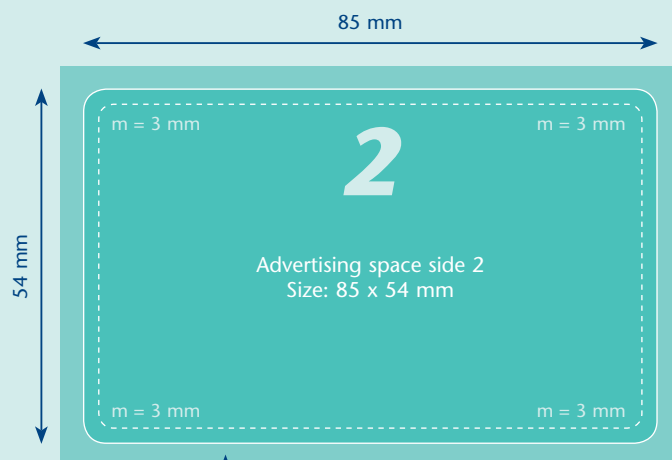

- Sides 1 and 2 are customisable.
- The **DentaFlossCard** has a production margin of approx. 2 mm, so the design should maintain an edge distance of approx. 3 mm.
- The positions of the dental floss dispensing hole and the dental floss cutter must be taken into account.
- The area is 85 x 54 mm per side.

Information for CREATING digital templates

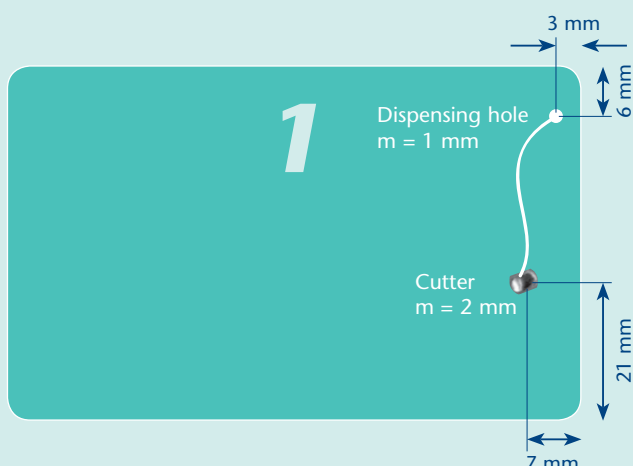

- 3-5 mm bleed margin around the outside.
- Create all pages in the file connected in a bundle.
- Printable data should be provided with precise position information. Register marks are also required for multicolour printing.
- Indicate custom colours (HKS or Pantone) in the file.
- Spot colours can also be implemented, of course!
- Photos must be inserted in CMYK mode or as HKS colours (duplex).
- The image elements used may not be compressed.
- Offset printing: optionally with matt or gloss finish.

Information for DELIVERING digital templates

- File delivery: e.g. QuarkXPress, Photoshop or InDesign.
- Font packs for the fonts used in the design must be attached. PDF files (print optimised 300 dpi, embedded fonts) are preferred.
- Data can also be transferred on CD/DVD-ROM.

Background
incl. 3-5 mm trim

Position and size of the dental floss dispensing hole and the dental floss cutter on side 1.
Dimensions: centre of hole to beginning of card format.
